MEASURE

Our “little black boxes” connect easily and non-invasively with any type or age of machine regardless of manufacturing process.

ANALYZE

Focusing on the “value adding work” and finding the actionable information that can make a difference right now.

SHARE

We are the leader in our market because we make information available to all team members in real time. Engaging people and putting everyone on the same page.

**It's more than just about data,
it's about actionable information,
communication and empowerment.**

TYPE OF PROCESSES

- Machining
- Injection Molding
- Crimping
- Welding
- Stamping
- Assembly Stations
- Bending
- Cutting
- Lathes
- Broaching
- Flame/Plasma Cutting

...even manual processes

FreePoint Technologies allows you to monitor start times, cycle times, stop times, down times, parts per second time and more.

Tools	Description	
FPT-MS1 GATEWAY	USB data aggregator; communications hub	✓
FPT-4I REMOTE MODULE (STANDARD MODEL)	Wireless I/O Data "black box"; stand-alone data recorder model also available	✓
ACCESSORIES	Cable kits, range extenders, etc	✓
FPT STARTER KIT	Bundled "out-of-box experience" for one machine/process	✓
CELLMONITOR	Network Controller & local datalogging	✓

OUR TECHNOLOGY

Our control-agnostic technology allows companies to measure and record empirical production information on the plant floor, directly from any machine, in real-time. What gets measured, gets improved.

Start measuring productivity information today.
