

INSIGHTS FOR ACTION

FreePoint helps manufacturers to connect to your machines and with your people – today!

With our non-invasive and simple to use machine monitoring solution, manufacturers can start collecting data from machines and operators today to help make insightful decisions tomorrow.

FreePoint is committed to improving the plant floor with a core focus on three challenges facing manufacturers today:

1

DOWNTIME TRACKING

Management and operators have an immediate visual understanding of machine performance with the added capability for operators to narrate unexpected downtime

2

CONNECTING LEGACY MACHINES

Our patent pending system allows for manufacturers to finally be able to extract the important data from ALL machines on the plant floor, instantly

3

ENGAGING EMPLOYEES TO INCREASE PRODUCTIVITY

Employees are provided with an engagement tool that encourages their participation, input and feedback which has been proven to increase productivity
